Find the Prime Factors of the Numbers

Prime Factors

   x    x    x    = 16

Prime Factors

   x    x    x    = 84

Prime Factors

   x    x    x    = 126

Prime Factors

   x    x    x    = 81

Prime Factors

   x    x    x    = 60

Prime Factors

   x    x    = 50

### Find the Prime Factors of the Numbers

Factors  
 $2 \times 2 \times 2 \times 2 = 16$

Factors  
 $2 \times 2 \times 3 \times 7 = 84$

Factors  
 $2 \times 3 \times 3 \times 7 = 126$

Factors  
 $3 \times 3 \times 3 \times 3 = 81$

Factors  
 $2 \times 2 \times 3 \times 5 = 60$

Factors  
 $2 \times 5 \times 5 = 50$
